EDUCATION

Binghamton University, State University of New York	Expected August 2026
Bachelor of Science in Biological Science Minor: Data Studies GPA:3.49	
- Honors thesis: Morphometric Identification of Noctuid Moths - Dean's List: Fall 2025	
Corning Community College	August 2023 - May 2024
Completed coursework in Mathematics and Science Associates Program	

RESEARCH EXPERIENCE

Honors Thesis Morphometric Identification of Noctuid Moths	August 2025 - Present
Undergraduate Student, Binghamton University, Lab supervisor Dr. Eliza Grames	
Committee Members: Dr. Eliza Grames, Dr. Jacob Palmer, Dr. Amber Churchill	
- Poster at Research Days (5/1/2026). - Presentation at EntSoc Northeast Branch (3/15/2026). - Developing a computer program in R to automatically identify noctuid moths from images using characteristics like wing shape, color and pattern.	
Binghamton University Projects for New Undergraduate Researchers (BUPNUR)	May - August 2025
Undergraduate Student, Binghamton University	
- Mentored by PhD student Joe Elias on computational approaches for species identification. - Identified and created a dataset of moth images to support future moth identification tools. - Labeled Orthoptera calls using spectrograms to adapt BirdNET for insect acoustic detection. - Programmed in R to build a prototype moth identification tool. - Assisted in the field photography of moths for lab dataset images.	
Class Project: Antimicrobial Properties of Plant Extracts	May 2024
Undergraduate Student, Corning Community College, General Biology II	
- Investigated the antimicrobial effects of plant extracts on <i>Alcaligenes faecalis</i> and <i>Staphylococcus epidermidis</i> to identify potential natural antibiotics. - Conducted laboratory experiments, data collection, and statistical analysis to evaluate the antimicrobial properties of plant extracts. - Utilized sterile techniques and disk diffusion assays, to assess bacterial inhibition patterns.	

HONORS, AWARDS, AND FUNDING

BUPNUR: \$5000	May - August 2025
Undergraduate Research Award (URA): \$422.00	November 2025

SKILLS

Relevant Courses: Cell Biology, General Microbiology, Organic Chemistry I & II, Statistics, Data Visualization

Laboratory Techniques: Aseptic technique, cell and bacterial culture, Gram staining, continuous culture, antimicrobial susceptibility testing, Western blotting

Technical Skills: R, Python, JavaScript, Tableau Public, Welding

CPR Certified: 2025-2027

WORK EXPERIENCE

IncubatorWorks Intern - Elmira, NY	July - August 2024
- Led workshops and chaperoned field trips to encourage creative thinking and networking. - Helped deliver curriculum, facilitate activities, and mentor program participants. - Tracked attendance and coordinated events to keep the class day running smoothly.	
STELA Robotics Coach - Elmira, NY	November 2023 - June 2024
- Coached and prepared students (ages 8-11) for a robotics competition. - Taught programming and mechanical design using Python and robotics kits.

COMMUNITY INVOLVEMENT

Gardening Club - Been involved in VINES garden work days, Willow Point Nursing Home Cleanups, BU Acres workdays, and other sustainability promoting events, I am also maintaining a community garden plot.

The Upcycling Project - Engaging in sustainable initiatives, by sorting recyclable materials and selling them to recycling companies for profit, to fund future research projects.

Biochemistry Club - Participating in events discussing current biochemical research.

SAE Go-Karts (Jan - May 2025) - Collaborated with a team to design and build competitive go-kart.

Math Club Member (Jan - May 2024) - Contributed to problem-solving activities and discussions, as well as helping with events like Pi Week, the NYSMATYC Competition, and Women in STEM initiatives.
